

EGRESS DOORS

Welded 2x2 steel frame, powder coated to match the enclosure. Glazed upper, solid kick panel, heavy-duty closer. Sizes below are typical and are confirmed at the design consultation.

Standard specification

- ★ Welded 2x2 steel tube frame, fully welded corners.
- ★ Powder coated (Tiger Drylac) to match the enclosure hardware.
- ★ Glazed upper with a solid kick panel below; full-clear and full-solid are options.
- ★ Heavy-duty commercial door closer, self-closing.
- ★ Three heavy-duty hinges; door stops top and bottom.
- ★ Pull handle outside, push to exit inside. Panic hardware on request.
- ★ Opens outward for egress. Swing and hinge side set at the design consultation.
- ★ Transom above the door is glazed to match, or infilled with enclosure fabric.
